L'impression 3D ou fabrication additive regroupe les procédés de fabrication de pièces en volume par ajout de matière en couches successives depuis une modélisation 3D, par opposition à la fabrication soustractive. Le principe reste proche de celui d'une imprimante 2D classique à cette grande différence près : c'est l'empilement des couches qui crée le volume. With Creo 7.0, you will be able to design the most innovative products faster and be able to avail of the latest in generative design, real-time simulation, multibody design, additive manufacturing and CAM. ...
